Stetra Board

Prefabricated XPS Structures

Stetra L / U Angle Board and Stetra Wash Basin are prefabricated waterproof elements designed to simplify and speed up the construction of structures and furnishings in bathrooms and other wet areas. Manufactured with a closed-cell XPS core that is waterproof and resistant to mould growth, and coated with a special glass fibre mesh reinforced surface layer, they provide lightweight performance, structural stability, and long-term reliability.

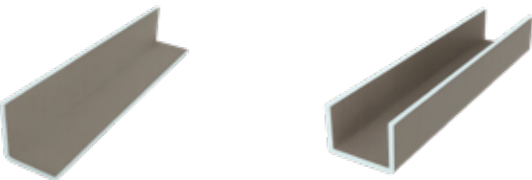

Stetra L / U Angle Board is the ideal solution for cladding pipework, bathtubs, shower trays, and other technical installations. Its pre-assembled shape significantly reduces installation time and labour costs. Stetra Wash Basin, on the other hand, is a prefabricated washbasin structure ready to be finished with ceramic tiles, porcelain stoneware, or natural stone. It is ideal for creating custom-made, wall-mounted, or integrated bathroom basins, delivering a modern, elegant, and highly functional result.

Stetra L / U Angle Board

Code	Thickness	Length	Width
LAP26015152	20	2600	150-150
LAP26020202	20	2600	200-200
LAP26030302	20	2600	300-300
LAP26020202	20	2600	400-200
SUA2602202020	20	2600	200-200-200
SUA2602153015	20	2600	150-300-150

Stetra L / U Angle Board is the ideal solution for the cladding and enclosure of plumbing pipes, bathtubs, and shower trays, providing excellent waterproofing and insulation properties. It can be installed quickly using flexible adhesives, ensuring a simple, fast, and efficient installation process.

Stetra Wash Basin

Code	Thickness	Length	Width
SWB125050	120 mm	500 mm	500 mm
SWB1213050	120 mm	1300 mm	500 mm

Stetra Wash Basin is a prefabricated solution featuring integrated moulded elements for the installation of taps and drainage systems, ensuring precision, practicality, and fast assembly.

Designed for direct tile application, its surface provides a reliable, ready-to-use substrate that simplifies both installation and finishing operations.

Custom dimensions are available to meet specific project requirements.

Stetra Toilet Board

Code	Thickness	Length	Width
STB120902	20 mm	1200 mm	900 mm
STB1301202	20 mm	1300 mm	1200 mm
STB1501202	20 mm	1500 mm	1200 mm

Stetra Toilet Board is a prefabricated XPS panel designed for the construction of support structures for sanitary ware, offering strength, practicality, and fast installation.

Ready for direct tiling, it provides a reliable surface that simplifies installation and finishing.
