Stetra Shower

XPS Shower Tray Board

Stetra Shower is a waterproof shower tray designed for the construction of level-access shower areas in both residential and commercial environments. Manufactured with a closed-cell XPS core that is waterproof and resistant to mould growth, it provides a lightweight, durable, and ready-to-tile solution. Thanks to its pre-formed slope and linear drainage system, Stetra Shower ensures efficient water drainage while simplifying installation. Available in a range of sizes and configurations, Stetra Shower offers maximum design flexibility, allowing the shower area to be customised in terms of shape, dimensions, and drain position to meet specific architectural and design requirements.

Stetra Shower

Stetra Shower is a pre-sloped, fully waterproof shower tray featuring an integrated linear drainage system that ensures reliable performance and maximum precision. Available in a wide range of sizes and configurations, it offers outstanding flexibility in shower area design, providing complete freedom in the selection of shower tray dimensions and shape, as well as the position of the drain outlet.
