Stetra Niche

Prefabricated XPS / EPS Niches

Stetra Niche is a range of prefabricated waterproof XPS and EPS niches designed for the creation of recessed storage compartments in environments finished with ceramic tiles, porcelain stoneware, and natural stone. Compatible with ceramic tiles, porcelain stoneware, and natural stone coverings, they allow for quick installation and precise integration with surrounding surfaces. The waterproof structure ensures continuity of the waterproofing system, while the clean, minimalist design facilitates installation in tiled showers and other moisture-prone environments. Suitable for both residential and commercial applications, the range delivers long-term durability, reliability, and compatibility with the main tiling systems available on the market.

Stetra XPS Niche

Code	Internal Dimensions	External Dimensions
NIXPS210210	210x210x88 mm	310x310x100 mm
NIXPS306306	306x306x88 mm	406x406x100 mm
NIXPS306508	306x508x88 mm	406x608x100 mm
NIXPS3061170	306x1170x88 mm	406x1270x100 mm

Stetra XPS Niche consists of prefabricated niches that provide a waterproof substrate for the construction of showers, bathrooms, and any environment exposed to high levels of moisture. Ideal for creating practical recessed storage compartments, they offer a tile-ready solution that ensures fast installation, long-term reliability, and seamless integration with tiled surfaces.

Stetra EPS Niche

Code	Internal Dimensions	External Dimensions
NIEPS210X210	210x210 mm	273x273x102 mm
NIEPS311X311	311x311 mm	400x400x102 mm
NIEPS311X508	311x508 mm	400x603x102 mm
NIEPS203159NC	203x159 mm - 203x311 mm	273x603x102 mm
NIEPS311159WC	311x159 mm - 311x311 mm	400x603x102 mm

Stetra EPS Niche consists of prefabricated niches made from high-density expanded polystyrene, a lightweight yet durable material. Featuring a waterproof finish and ready for direct tile application, they provide a practical and functional solution for creating recessed storage compartments in showers, bathrooms, and other wet areas. Designed for easy installation, they ensure seamless integration with tiled surfaces while delivering long-lasting performance and reliability.
