

Stetra Tub

Code	Dimensions	Diameter
ACMAN120D12	120x120 mm	Ø12 mm
ACMAN120D30	120x120 mm	Ø30 mm
ACMAN150D50	150x150 mm	Ø50 mm
ACMAN190D70	190x190 mm	Ø70 mm

Stetra Tub is a flexible waterproof pipe collar designed to create a secure and watertight seal around pipe penetrations. Thanks to its high elasticity, it can absorb movement and vibration, helping to prevent water ingress and cracking at critical connection points while ensuring long-lasting waterproof protection. Compatible with Stetra waterproofing systems, it helps maintain the continuity and integrity of the waterproof barrier throughout the entire installation.

Stetra Butyl Tape

Code	Height	Length
NBUT25X15SP10	25 mm	15000 mm
NBUT5X15SP10	50 mm	15000 mm

Stetra Butyl Tape is a high-performance self-adhesive sealing tape made of butyl rubber and surface-coated with a polypropylene nonwoven fabric. The butyl adhesive provides excellent bonding to both porous and smooth surfaces, including concrete, plasterboard, marble, plastic, glass, and bituminous membranes. The nonwoven surface is compatible with most commonly used adhesives, both cement-based and non-cementitious, allowing sealing applications in the vicinity of joints and making it ideal for use beneath ceramic, marble, and wood coverings.

Stetra Mesh Tape

Code	Height	Length
ACNRA4550	45 mm	50 mm
ACNRA45100	45 mm	1000 mm

Stetra Mesh Tape is a self-adhesive glass fibre mesh tape designed to reinforce joints and connections between construction boards and substrates. Easy to apply and available in different widths, it helps prevent crack formation at connection points, creating a stable and uniform surface for the subsequent application of finishing and waterproofing layers.

Stetra Knife

Code	Angle
ACSPA90	Right Angle
ACSPADIR	Flat Angle

Stetra Knife is a lightweight and durable application tool designed for the spreading of sealants, adhesives, and waterproofing products on flat surfaces. Thanks to its robust profile and shaped edge, it is also ideal for laminating membranes, self-adhesive mesh tapes, and other sheet materials, ensuring uniform adhesion and a professional finish during installation.

Stetra Washer

Code	Dimensions	Diameter
ACRON36F5	Ø36 mm	Ø5 mm

Stetra Washer is a stainless steel fixing washer designed to securely anchor Stetra construction boards to metal frameworks, timber stud walls, and other supporting structures. Thanks to its wide bearing surface, it distributes the fastening load over a larger area, improving panel stability and reducing the risk of tear-out or failure at fixing points.

Stetra Fix

Code	Dimensions	Diameter
ACFMZ50D8	L50 mm	Ø8 mm
ACFMZ80D8	L80 mm	Ø8 mm
ACFMZ110D8	L110 mm	Ø8 mm

Stetra Fix is a fixing system designed to securely anchor Stetra construction boards to concrete and masonry substrates. Available in various lengths to accommodate different board thicknesses, it provides a strong and reliable mechanical connection, ensuring installation stability and long-lasting performance over time.
